DR. TALMAGE TELLS OF HIS JOUR-

ACROSS THE CONTINENT.

NEYS FROM SEA TO SEA.

America for God." His Theme-This Co. tinent Must Be Thoroughly Dominated by the Christian Religion-flow to

sea, or between the Red sea and the Mediterranean sea, or between the Black sea and the North sea. No; in such case my text would have named them. It meant from any large body of water on the earth clear across to any other large body of water. And so I have a right to read it; He shall have dominion from the Atlantic sea to the Pacific sea. My theme is, America for God!

THE IMMENSITY OF AMERICA. First, consider the immensity of this procession. If it were only a small tract of land capable of nothing better than sage brush and with ability only to support prairie dogs, should not have much enthusiasm in wanting Christ to have it added to his dominion. But its immensity and af fluence no one can imagine unless, in immigrant wagon or stage coach or in rail train of the Union Pacific or the Northern Pacific or the Canadian Pacific or the Southern Pacific, he has traversed it. Having been privileged six times to cross this continent, and twice this summer, I have come to some appreciation of its magnitude. California, which I supposed in boy hood from its size on the map, was a Low yards across, a ridge of land on which one must walk cautiously lest he hit his head against the Sierra Ne-vada on one side or slip off into the Pacific waters on the other, Califor territory, to be launched next winter into statehood, will be giants at their birth. Let the congress of the United States strain a point and soon admit also Idaho and Wyoming and New Mexico. What is the use keeping them out in the cold any longer? as have the whole continent divided into states with senatorial and congressional representatives and we will all be happy together. If some of them have not quite the requisite number of people, fix up the constitu tion to suit these cases. Even Utah will by dropping polygansy soon be ready to enter. Monogamy has trumplied in parts of Utah and inplied in parts of Utah and probably triumph at this election in Salt Lake City. Turn all the territories into states and and Leveler. if some of the sisters are smaller than and the others only four feet, do not let the daughters feet live high shut the door in the faces of those who are only four feet high. Among the dying utterances of our good friend, the wise statesman and great author, the brilliant orator and magnificent soul, S. S. Cox, was the expressed de-termination to move next winter in congress for the transference of other

"But," says some one, "in calculating the immensity of our continental acreage you must remember that vast reaches of our public domain are uncultivated, heaps of dry sand, and the bad lands of Montana and the great American desert." I am glad you mentioned that. Within twenty-five years there will not be between the Atlantic and Pacific coasts a hundred miles of land not reclaimed either by farmers' plaw or miners' crowbar. By irrigation the waters of the rivers and the showers of heaven in what are called the rainy season will be gather-ed into great reservoirs and through aqueducts let down where and when aqueducts let down where and when the people want them. Utah is an ob-ject lesson. Some parts of that territory which were barren that a spear of grass could not have been raised there in a hundred years are now rich as Lancaster county farms of Pennsyl-vania or Westchester farms of New

York or Somerset county farms of New Jersey.

Experiments have proved that ten acres of ground irrigated from waters gathered in great hydrological basins will produce as much as fifty acres from the downpour of rain as seen in our regions. We have our freshets and our droughts, but in those lands which are to be scientifically irrigated there will be neither freshets nor droughts. As you take a pitcher and get it full of water and then set it on a table and take a drink out of it when you are thirsty and never think of drinking a pitcherful all at once, so Montana and Wyoming and Idaho will catch the rains of their rainy season and take up all the waters of their rivers in great pitchers of reservoirs and drink out of them whenever they will and refresh their land whenever

will and refresh their land whenever they will.

The work has already been grandly begun by the United States government. Over four hundred lakes have already been officially taken possession of by the nation for the great enterprise of irrigation. Rivers that have been rolling idly through these regions, doing nothing on their way to the sea, will be lassoed and corralled and penned up until such time as the farmers need them. Under the same processes the Ohio, the Mississippi and all the other rivers will be taught to be have themselves better, and great basins will be made to catch the surplus of waters in times of freshet and keep them for times of drought. The irrigating process by which all the arid lands between the Atlantic and Pacific oceans are to be fertilized is no new experiment. It has been going on suc

cessfully hundreds of years, in Spain, in China, in India, in Russia, in Egypt. waters as innocent and smiling as a about twenty fathous deep. waters as innocent and smiling as a child making a first attempt to walk About eight hundred million of people of the earth today are kept alive by food raised on irrigated land. of basalt. Through an eyeglass we see among it the young cagles, but the stoutest arm of our group cannot hurl a stone near enough to disturb the Dome and heights never captured save by the fiery bayonets of the thunder feathered domesticity. Yonder are heights that would be chilled with Yonder are No pause for the eye, no stopping place for the mind. Mountains hurled on mountains. Mountains in the wake horror but for the warm robe of for-est foliage with which they are en-wrapped. Altars of worship at which of mountains. Mountains flanked by nations might kneel. Domes of chal cedony on temples of porphyry. See all this carnage of color up and down the cliffs; it must have been the bat-Mountains triumphant. As though Mont Blane and the Adirondacks and Mount Washington were here uttering themselves in one magnifi-Mont Blane and the Adirondacks and Mount Washington were here uttering themselves in one magnificent chorus of rock and precipice and waterfall. Sifting and dashing through the rocks, the water comes the water the christian association building. "At Lincoln, Neb., and the Adirondacks and Mount Washington were here uttering themselves in one magnificent the lield of the war of the elements, the buildings rising. In Vancouver's I was turns stammer their new buildings rising. In Vancouver's I was the lield of the war of the elements, the lield of the war of the elements, the lield of the war of the elements. Here are all the colors of the wall of wasked: "What are you going to put on that sightly place?" The answer was: "A Young Men's Christian association building." At Lincoln, Neb., through the rocks, the water comes down. The Bridal Veil falls, so thin you can see the face of the mountain pearls wanting. If spirits bound pearls wanting. If spirits bound from earth to heaven could pass up by way of this canyon, the dash of heavenly beauty would not be so overdropping 2,634 feet, sixteen times greater descent than that of Niagara. These waters dashed to death on the rocks, so that the white spirit of the heavenly beauty would not be so overpowering. It would only be from
glory to glory. Ascent through such
earthly scenery in which the crystal
is so bright and the red so flaming
would be fit preparation for the "sea
of glass mingled with fire."

Standing there in the Grand canyon
of the Yellowstone park on the morning of Aug. 9, for the most part we
held our peace, but after a while it slain waters ascending in robe of mist seeks the heaven. Yonder is Nevada folls plunging seven hundred feet, the water in arrows, the water in rockets, the water in pearls, the water in am-

held our peace, but after a while it flashed upon me with such power 1 jewels to array all the earth in beauty, and rushes on until it drops into a could not help but say to my comrades:
"What a Hall this would be for the last Judgment!" See that mighty cascade with the rainbows at the foot of it. very hell of waters, the smoke of their torment ascending forever and ever. AN IMPRESSION THAT WILL LAST FOR-But the most wonderful part of this American continent is the Yellowstone park. My visit there last month made upon me an impression that will last forever. After all poetry has example the cast at his feet. At the made upon me an impression that will last forever. After all poetry has ex-hausted itself and all the Morans and Bierstadts and the other enchanting bottom of this great canyon is a floor on which the nations of the earth might stand and all up and down these artists have completed their canvas there will be other revelations to make galleries of rock the nations of heaven and other stories of its beauty and might sit. And what reverberation of archangels' trumpet there would be writh, splendor and agony, to be recited. The Yellowstone park is a geolthrough all these gorges and from all these caverns and over all these heights. Why should not the greatest of all the days the world shall ever ogist's paradise. By cheapening of travel may it become the nation's playground! In some portions of it there seems to be the anarchy of the elesee close amid the grandest scenery Omnipotence ever built? Fire and water, and the vapor born of that marriage, terrific. Geyser cones or hills of crystal that have been over five thousand years growing. In places the earth, throbbing, sobbing,

Omipotence ever built?
Oh, the sweep of the American continent! Sailing up Puget sound, its shores so bold that for fifteen hundred miles a ship's prow would touch the shore before its keel touched the bottom. I said: "This is the Mediterranean of America." Visiting Portland and Tacoma and Seattle and Victoria and Fort Townsend and Vancouvers and other cities of At the expiration of every sixty-five minutes one of the geysers tossing its boiling water 185 feet in the air and then descending into stringing rainbows. Caverns of pictured walls large enough for the sepulcher of the human race. Formations of stone in Vancouvers and other cities of that northwest region I thought to myself: These are the Bos-tons. New Yorks, Charlestons and Savanuals of the Pacific coast. But after all this summer's journeying collectors of coffee samples for make trope, of rose, of cowship, of sun-flower, and of gladiola. Sulphur and arsenic and oxide of iron, with their other summers. I found that I had seen only a part of the American condelicate pencils, turning the hills into a Luxemburg or a Vatican picture gallery. The so called Thanatopsis geyser, exquisite as the Bryant poem it was named after, and the so called Evangeline geyser, lovely as the Longfellow heroine it commemorates. white elevation preaching mightier sermons of God than human lips ever uttered. The so called Bethesda gey-ser, by the warmth of which invalids have already been cured, the Angel

of Health continually stirring the waters. Enraged craters, with heat at five hundred degrees, only a little the Atlantic to the Pacific. Beside that, the salvation of this continent means the salvation of Asia, for we are only thirty-six miles from Asia at the northwest. Only Behring straits separate us from Asia, and these will be spanned by a great bridge before another century closes, and probably long before that. The thirty-six miles of water between these two continents are not all deep sea, but have three are not all deep sea, but have three centage of adulterant, the brine bewage dark brown — Boston Herald. Here and there are petrified growths or the dead trees, and vegetation of other ages kept through a process of will allow piers for bridges, and for which a still larger pears of adulterant, the brine becomes dark brown.—Boston Herald.

about twenty fathoms deep.

The Americo Aziatic bridge which

NUMBER 13

will yet span those straits will make America, Asia, Europe and Africa one continent. So you'see America evangel ized. Asia will be evangelized. But after you have wandered along taking Asia from one side and America taking it from the other side. Our great-grandchildren will cross that bridge. America and Asia and Europe all one, what subtraction from the pangs of seasickness! and the prophecies in Revelation will be fulfilled. mean literally that this American conti Christopher Columbus, when he went second brother Alonzo when he went ashore from the Pinta, and his third brother Vincent, when he went ashore from the Nina, took possession of this country in the name of the Father and the Son and the Holy Ghost.

Satan has no more right to this country than I have to your pocket But while I speak of the immensity of the continent. I must remark it is not an immensity of monotone or tameness. The larger some countries are, the worse for the world. This continent is not more remarkable for its magnitude than for its wonders of construction. What a pity the United States government did not take possession of Vosquile Chilicanian of States and Volume of Vosquile Chilicanian of granite constructed services of the immensity of monotone or tameness. The larger some countries bow ring.

Gothic arches, Corinthian capitals and Egyptian basilicas built before the world and the glory of them, you might suppose that Satan was a great capitalist or that he was loaded up with real estate, when the old misreason I protest against something I heard and saw this summer and other summers in Montana and Oregon and Wyoming and Idaho and Colorado California. They have given devilistic names to many places in the

As soon as you get in Yellowstone park or California you have pointed out to you places cursed with such names as "The Devil's Slide," "The Devil's Kitchen," "The Devil's Thumb," "The Devil's Pulpit," "The Dovil's Mush Pat" "The bovil's Team Devil's Mush Pot," "The Devil's Tea Kettle," "The Devil's Saw Mill," "The Devil's Machine Shop," "The Devil's Gate" and so on. Now it is very much needed that geological surveyor or congressional committee or group of distinguished tourists go through Montana and Wyoming and California and Colorado and give other names to these places. All these regions benation, and away with such Plutonic

nomenclature. HOW TO DO THE GOOD WORK. But how is this continent to be gospelized? The pulpit and a Christian printing press harnessed together will be the mightiest team for the first plow. Not by the power of cold, formalistic theology, not by ecclesiastical technicalities. I am sick of them and the world is sick of them. But it will be done by the warm hearted, sympafall into the Gulf Stream and get melted. Take all your creeds of all denominations and drop out of them all human phrascology and put in only scriptural phraseology and you will see how quick the people will

jump after them.
On the Columbia river a few days ago we saw the salmon jump clear out of the water in different places, I suppose for the purpose of getting the in scets. And if when we want to fish for men we could only have the right kind of bait they will spring out above the flood of their sins and sorrows to associations of America will also do Lent I saw this summer their new I said: "What are they making those excavations for?" Answer: "For our Young Men's Christian association building." At Des Meines, Ia., I saw a noble structure rising and I asked for what purpose it was being built, and they told me for the Young Men's Christian association.

These institutions are going to take

the young men of this nation for God. These institutions seem in better favor with God and man than ever before. Business men and capitalists are awak-ing to the fact that they can do nothing better in the way of living beneficence or in last will and testament than to lyn when he made our Young Men's Christian paiace possible. These in-stitutions will get our young men all over the land into a stampede for heaven. Thus we will all in some way help on the work, you with your ten talents, I with five, somebody else with three. It is estimated that to irrigate the arid and desert lands of America as they ought to be irrigated, it will cost about one hundred million dollars to gather the waters into reser voirs. As much contribution and effort as that would irrigate with gos-pel influences all the waste places of this continent. Let us by prayer and contribution and right living all help to fill the reservoirs. You will carry a bucket and you a cup, and even a thimbleful would help. And after a while God will send the floods of mercy so gathered, pouring down over all the land, and some of us on earth and some of us in heaven will sing with Isaiah: "In the wilderness waters have broken out and streams in the desert," and with David: is a river the streams whereof shall make glad the sight of God." Oh, fill up the reservoirs! America for God!

The chief analyst of the Dominion department of inland revenue publishes the following directions to his ing their preliminary tests. It is Ha-gar's method modified: Prepare a saturated solution of common salt. tinent, for Alaska is as far west of San
Francisco as the coast of Maine is east
of it, so that the central city of the
American continent is San Francisco.

Iffated solution of Common Shake up a small quantity of the coffee to be tested with ten times its bulk
of the brine, in a test tube at least
three-quarters of an inch in diameter. ASIA AND AMERICA.

I have said these things about the coffee may be thoroughly wetted, and magnitude of the continent and given you a few specimens of some of its an hour. Observe then the color of wonders and let you know the come the brine and the quantity of the preliensiveness of the text when it says that Christ is going to have dominion from sea to sea; that is, from the Atlantic to the Pacific. Beside the Atlantic to the Pacific. Beside the whole of the coffee floats,
